The Science of the Total Environment, 135 (1993) 171
Elsevier Science Publishers B.V., Amsterdam

Author Index

Aherne, G.W. 73
Ansell, R.O. 95

Beebee, T.J.C. 123
Benson, R.L. 17
Braithwaite, A.C. 115
Bushby, B. 81

Chester, R. 153
Cresser, M. 67
Cussen, H. 115

Davies, J.E.D. 145

Edwards, T. 27
Edwards, T. 67

Fernandes, A. 81
Ferrier, B. 27

Gardner, B. 55
George, D.G. 1

Harland, B.J. 37
Harriman, R. 27
Haygarth, P.M. 131
Hewitt, C.N. 55

Jarvis, K.E. 137

Kibblewhite, M. 81

Lange, J.D. 131
Littlejohn, J.W. 161

McAleer, H. 95
McCurdy, E.J. 131
McNaughtan, A. 95
Melvin, M.A.L. 161

Narayanaswamy, R. 103
Nicholson, P.J. 37
Nimmo, M. 153

Petrie, A.J. 161
Plane, N.H. 161
Pugh, J.R. 95

Ron Vaz, L. 67

Shand, C. 67

Wallace, D. 81
Williams, J.G. 137
Wills, J.D. 137
Wilson, T.R.S. 115
Worsfold, P.J. 17

The Science of the Total Environment, 135 (1993) 173–174
Elsevier Science Publishers B.V., Amsterdam

Subject Index

Activated carbon, herbicide, peat, sand, water treatment, 161
Aluminium, flow injection, process monitor, iron, water, solid state detector potable, 17
Antibodies, immunoassay, micropollution, water analysis, ELISA, 73
Atmospheric deposition, trace organic micropollutants, 81

Chemical scales, physical scales, freshwater lakes, reservoirs, 1
Chemical sensor, optical fibre, transducer, environmental, 103
Continuous monitoring, membrane inlet, mass spectrometry, volatile organic chemicals, environmental, 37

Deposition, polycyclic aromatic hydrocarbons, sampling, 55
DNA, natural freshwaters, 123

Electrode, oxygen, porewaters, sensor, ocean, sediments, 115
ELISA, immunoassay, antibodies, micropollution, water analysis, 73
Environmental, membrane inlet, mass spectrometry, volatile organic chemicals, continuous monitoring, 37
Environmental, optical fibre, chemical sensor, transducer, 103
Extraction technique, soil solution, phosphorus fractions, organic soil, 67

Flow injection, process monitor, aluminium, iron, potable water, solid state detector, 17
Freshwater lakes, physical scales, chemical scales, reservoirs, 1

Herbicide, activated carbon, peat, sand, water treatment, 161

Hydride generation, selenium, ICP-MS, sediments, 131

ICP-MS, selenium, hydride generation, sediments, 131
Immunoassay, antibodies, micropollution, water analysis, ELISA, 73
In situ analysis, voltammetric analysis, lead analysis, 95
Inductively coupled plasma mass spectrometry, on-line ion exchange, preconcentration, 137
Infrared spectroscopy, Raman spectroscopy, vibrational spectroscopy, water analysis, 145
Ion exchanges resins, river water composition, monitoring, X-ray fluorescence examination, 27
Iron, flow injection, process monitor, aluminium, water, solid state detector, 17

Lead analysis, voltammetric analysis, in situ analysis, 95

Mass spectrometry, membrane inlet, volatile organic chemicals, environmental, continuous monitoring, 37
Membrane inlet, mass spectrometry, volatile organic chemicals, environmental, continuous monitoring, 37
Micropollution, immunoassay, antibodies, water analysis, ELISA, 73
Monitoring, ion exchanges resins, river water composition, X-ray fluorescence examination, 27

Natural freshwaters, DNA, 123

Ocean, oxygen, porewaters, sensor, sediments, electrode, 115
On-line ion exchange, preconcentration, inductively coupled plasma mass spectrometry, 137

Optical fibre, chemical sensor, transducer, environmental, 103
Organic soil, soil solution, phosphorus fractions, extraction technique, 67
Oxygen, porewaters, sensor, ocean, sediments, electrode, 115

Peat, activated carbon, herbicide, sand, water treatment, 161
Phosphorus fractions, soil solution, extraction technique, organic soil, 67
Physical scales, chemical scales, freshwater lakes, reservoirs, 1
Polycyclic aromatic hydrocarbons, deposition, sampling, 55
Porewaters, oxygen, sensor, ocean, sediments, electrode, 115
Preconcentration, on-line ion exchange, inductively coupled plasma mass spectrometry, 137
Process monitor, flow injection, aluminium, iron, water, solid state detector, 17

Rainwaters, speciation, trace metals, 153
Raman spectroscopy, infrared spectroscopy, vibrational spectroscopy, water analysis, 145
Reservoirs, physical scales, chemical scales, freshwater lakes, 1
River water composition, ion exchanges resins, monitoring, X-ray fluorescence examination, 27

Sampling, polycyclic aromatic hydrocarbons, deposition, 55
Sand, activated carbon, herbicide, peat, water treatment, 161
Sediments, oxygen, porewaters, sensor, ocean, electrode, 115
Sediments, selenium, hydride generation, ICP-MS, 131
Selenium, hydride generation, ICP-MS, sediments, 131
Sensor, oxygen, porewaters, ocean, sediments, electrode, 115
Soil solution, phosphorus fractions, extraction technique, organic soil, 67
Solid state detector, flow injection, process monitor, aluminium, iron, water, 17
Speciation, trace metals, rainwaters, 153

Trace metals, speciation, rainwaters, 153
Trace organic micropollutants, atmospheric deposition, 81
Transducer, optical fibre, chemical sensor, environmental, 103

Vibrational spectroscopy, infrared spectroscopy, Raman spectroscopy, water analysis, 145
Volatile organic chemicals, membrane inlet, mass spectrometry, environmental, continuous monitoring, 37
Voltammetric analysis, in situ analysis, lead analysis, 95

Water, flow injection, process monitor, aluminium, iron, solid state detector, 17
Water analysis, immunoassay, antibodies, micropollution, ELISA, 73
Water analysis, infrared spectroscopy, Raman spectroscopy, vibrational spectroscopy, 145
Water treatment, activated carbon, herbicide, peat, sand, 161

X-ray fluorescence examination, ion exchanges resins, river water composition, monitoring, 27
